

## Pulp Clamp

Pulp Clamp - There are many other forklift accessories that can be used to make forklifts much more efficient. Snowplow attachments can be mounted onto the front of a lift truck. A scoop bucket can be helpful if the job requires moving gravel, snow, sand, or soil. A double block handler permits the person operating the forklift to lift\carry two loads and pile them beside each other. Many of these accessories are considered excellent for light to medium tasks.

Another forklift attachment is the package lift clamp, that can lift and move really heavy pallets. Furthermore, pallet crane forks may be utilized in order to lift and move pallets with an overhead crane. A drum clamp accessory is useful for transferring very heavy drums from place to place without having to make use of a pallet. Lift truck mounted hoppers allow materials to be moved and dumped without having to handle it by hand. These hoppers when the bumper is released are self dumping.

Obtainable accessories now include accessories that enable a lift truck to do the job of a commercial mop or broom. Those specific accessories are most often utilized cleaning parking lots, warehouse floors, and boat docks. Forklift mounted platforms come outfitted with dual entry doors and could be attached to be able to transport staff from one area to another. The mounted platform attachment is ideal for reaching parts which could be hard to access, specifically if you have goods or stuff stored in out of the way places or really up high.

Attachments could be a really useful piece of equipment when installed onto a lift truck, transforming a usual forklift right into a mobile hoist unit. It's most useful when moving unstable or tricky loads. This attachment can either be mounted on the carriage itself, telescopic, or be attached or forklift mounted.
