

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora embarked on a cross country excursion in their RV. Freshly retired, after spending several years working with his brother to develop their crane company into an market leader, John had no idea that momentous trip would permit JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision materials handling technologies was the end result of a road trip.

During their journey, John reacquainted himself with past business acquaintances along the way. In combination with these conversations and a noteworthy event; two workers had been tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John discovered a vast market for a product that could promptly and securely elevate individuals in the air to accomplish upkeep and other construction services.

Upon returning from their travels, John formed a joint venture with two friends and bought a metal fabrication business in McConnellsburg, Pennsylvania. In 1970, starting operations with a crew of twenty workers, they designed and sold the first JLG aerial work platform. The company incorporates some of the simple design elements of that original lift into existing models.

JLG forklifts have come a ways from the time when Mr. John L. Grove came back to town from his cross-country road trip and since the first aerial work platform debuted on the market. Today, the company proudly continues to expand itself into many marketplaces globally and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer environment.
